Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter: During reasons of allowance examiner will refer to remark's presented in appeal brief dated March 17, 2006 and arguments presented June 6, 2006. In submitting appeal brief applicant was required to summarize the invention on pages 2 thru 7 of the appeal brief. In these pages applicant define that the system is used at a point of sale terminal (POS) in which is integrated additional which is advertisement or store promotion events. Additionally applicant also clarifies that that the customer select this additional information, by the display means which is merged into the receipt. The applicant on page 7 specifically describes how the data is merged on the receipt.

Further in the appeal applicant further clarifies applicant interpretation of the claims. On page 8 of the remarks in the appeal applicant defines that the additional information have a list of targeted customer to provide the promotion to is not equivalent to applicant invention. On page 9 applicant clarifies that if a item is pre-selected by the system to target the item at the customer, this is not the same as the customer selecting the item, at that time or when waiting time has elapsed. On page 10 and 11 applicant describes the merging of the receipt specifically that printing of the receipt must be continuous without stopping to print the different parts, even though the receipt may appear to interchange between receipt and additional information.

In arguments presented June 6, 2006 applicant clarified the amendment currently submitted, that the present invention is required to function that a item is selected from the display which present the list of additional information. Additionally applicant clarifies that the customer is required to accept the offer presented, in order for the present invention to function.

Therefore for the reasons presented above, the present invention is allowed. The prior art of record fails to present the present invention as the claims are interpreted in light of the specifically as applicant has specified in the appeal brief.
